

CHAPTER 6

SACO RIVER CORRIDOR

§951. Purpose

The Legislature finds that the Saco, Ossipee and Little Ossipee Rivers are largely unspoiled by intensive or poorly planned commercial, industrial or residential development; that existing water quality on the inland portions of these rivers is extremely high; that these rivers and their associated wetlands constitute an important present and future source of drinking water; that they support large and diverse aquatic populations; and that they are heavily used for fishing, swimming, canoeing, camping and other forms of outdoor recreation. [PL 1979, c. 459, §1 (NEW).]

The Legislature finds that the wetlands associated with these rivers constitute important water storage areas; that they moderate the flow of these rivers in time of flood and drought; that they replenish the groundwater; and that they provide nutrients and essential habitat for numerous species of fish, migratory birds and other forms of wildlife. [PL 1979, c. 459, §1 (NEW).]

The Legislature finds that the periodic flooding of these rivers contributes to the fertility of the adjacent lands; that the unrestricted flow of water within the floodway in the upper portions of these rivers is an essential factor in limiting the severity of flooding in the lower portions of these rivers; and that because the floodplains are largely undeveloped, the flooding which now occurs results in relatively little loss of life, personal injury and damage to property. [PL 1979, c. 459, §1 (NEW).]

The Legislature finds that these rivers and their adjacent lands possess outstanding scenic and aesthetic qualities and that certain areas along these rivers are of outstanding scenic, historic, archaeological, scientific and educational importance. [PL 1979, c. 459, §1 (NEW).]

The Legislature finds that the towns along these rivers are experiencing rapid population growth and that the rivers themselves are subject to increasing development pressures which threaten to destroy the quality of these rivers and the character of the adjacent lands. [PL 1979, c. 459, §1 (NEW).]

In view of the dangers of intensive and poorly planned development, it is the purpose of this chapter to preserve existing water quality, prevent the diminution of water supplies, to control erosion, to protect fish and wildlife populations, to prevent undue extremes of flood and drought, to limit the loss of life and damage to property from periodic floods; to preserve the scenic, rural and unspoiled character of the lands adjacent to these rivers; to prevent obstructions to navigation; to prevent overcrowding; to avoid the mixture of incompatible uses; to protect those areas of exceptional scenic, historic, archaeological, scientific and educational importance; and to protect the public health, safety and general welfare by creating the Saco River Corridor, established in section 953, and by regulating the use of land and water within this area. [PL 1989, c. 503, Pt. B, §177 (AMD).]

§958. Existing uses

Any existing building or structure or use of a building or structure lawful March 19, 1974, or on the date of any subsequent amendment of this chapter or of any regulation adopted hereunder, may continue although such a use of a structure does not conform to this chapter or the regulations adopted hereunder. Any existing building or structure may be repaired, maintained and improved, but an existing building, structure or nonconforming use may be extended, expanded or enlarged only by permit from the commission. A nonconforming use, other than a single family residential use, that is discontinued for any reason for a period of one year is deemed abandoned and may not be resumed thereafter except in compliance with the requirements of this chapter. [PL 1995, c. 171, §9 (AMD).]

If, as a result of flood, fire or other casualty, the value of a nonconforming building or structure is reduced by more than 75%, it may be rebuilt and the nonconforming use housed therein may be continued only by permit from the commission. If a nonconforming building or structure is decreased in value less than 75% by flood, fire or other casualty, it may be rebuilt in substantially the same location and in the same size without a permit from the commission, even though it would otherwise violate the requirements of this chapter, provided that the rebuilding shall be commenced within 12 months of the casualty. [PL 1979, c. 459, §1 (NEW).]

If 2 or more contiguous lots or portions thereof are in single ownership on or after March 19, 1974, and if all or part of the lots do not meet the criteria of lot width, area, frontage or other measures required under this chapter or if a building thereon could not meet the aggregate requirements established by this chapter, the lots involved shall be considered to be one parcel for the purposes of this chapter. [PL 1979, c. 459, §1 (NEW).]

To avoid undue hardship, nothing in this chapter may be deemed to require a change in the design, construction or intended use of any building or structure with respect to which substantial construction was legally carried out prior to March 19, 1974 or the effective date of any amendment to this chapter. An intended use within the meaning of this section is any use for which such a building or structure is designed as evidenced by the construction or by plans or specifications in existence as of March 19, 1974 or, in the case of any intended use affected by any amendment to this chapter, construction, plans or specifications in existence on the effective date of that amendment. §961. Relation to municipal, state and federal regulations

Nothing in this chapter prevents municipal, state or federal authorities from adopting and administering more stringent requirements regarding performance standards or permitted uses within use districts established by the commission or within districts overlapping the districts established pursuant to this chapter. Where there is a conflict between a provision adopted under this chapter and any other municipal, state or federal requirement applicable to the same land or water areas within the

corridor, the more restrictive provision takes precedence. All performance standards, rules and regulations proposed for hearing by the commission must be submitted to the Commissioner of Environmental Protection, the Department of Agriculture, Conservation and Forestry, the Greater Portland Council of Governments and the Southern Maine Regional Planning Commission at least 7 days prior to the hearing for review and comment. The commission may not adopt any rule establishing air or water quality standards within the corridor in conflict with the rules of the Department of Environmental Protection without the prior approval of the Board of Environmental Protection. §962. General performance standards

1. Standards. Unless otherwise specified, the following performance standards shall be applicable to all uses of land and water areas within the corridor, whether or not a permit is required from the commission.

A. No building may be located closer to the Ossipee, Little Ossipee or Saco rivers than 100 feet from the normal or mean high water line, nor may any building in the Limited Residential or Resource Protection Districts be located less than 30 feet from any accepted road. Within the Resource Protection and Limited Residential Districts there may be no construction or placement of residential structures within the 100-year floodplain. [PL 1995, c. 171, §11 (AMD).]

B. Within the Resource Protection District or Limited Residential District no part of a septic system or other system of underground sewage disposal shall be located within the 100-year floodplain. [PL 1979, c. 459, §1 (NEW).]

C. On the Ossipee and Little Ossipee Rivers and fresh-water portions of the Saco River:

(1) No privately-owned pier, dock or float shall extend more than 10% of the width of the river at any time or extend into the water more than 10 feet perpendicular to the shore, whichever is less; and

(2) All piers, docks or floats shall be temporary and capable of seasonal removal. [PL 1979, c. 459, §1 (NEW).]

D. Agriculture.

(1) All agriculture practices must be in conformance with existing state and federal laws and regulations relating to the use of insecticides, herbicides, fertilizers and cleaning agents, and with state and federal laws and regulations to the placement of disposal of wastes in waterways or on the banks thereof.

(2) Where soil is tilled, an untilled buffer strip of natural vegetation must be retained between the tilled ground and the normal or mean high water line of the river. The width of this strip must be a minimum of 25 feet, measured directly from the normal or mean high water line of the river.

(3) Newly created fields and tillage and grazing operations must be set back from the normal or mean high water line at least 75 feet. [PL 1995, c. 171, §11 (AMD).]

E. [PL 1995, c. 171, §12 (RP).]

E-1. Within a strip extending 100 feet inland from the normal or mean high water line, there may be no cleared opening or openings, except for approved construction, and a well-distributed stand of vegetation must be retained. Selective cutting of no more than 40% of the trees 4 inches or more

in diameter, measured at 4 1/2 feet above ground level, is allowed in any 10-year period, provided that a well-distributed stand of trees and other natural vegetation remains. [PL 1995, c. 171, §13 (NEW).]

F. The following standards govern timber harvesting within 250 feet of the normal or mean high water line of any water body within the corridor.

(1) Harvesting operations must be conducted in such a manner that a well-distributed stand of trees is retained.

(2) In any stand, harvesting may remove not more than 40% of the volume of trees 6 inches in diameter and larger, measured at 4 1/2 feet above ground level in any 10-year period.

(3) No significant accumulation of slash may be left within 50 feet of the normal or mean high water line of any water body within the corridor. At distances greater than 50 feet from the normal or mean high water line of such water bodies extending to the limits of the corridor, all slash must be disposed of in such a manner that it lies on the ground and no part thereof extends more than 4 feet above the ground.

(4) Harvesting operations must be conducted in such a manner and at such a time that minimal soil disturbance results. Adequate provision must be made to prevent soil erosion and sedimentation of surface waters. [PL 1995, c. 171, §14 (AMD).]

G. The minimum lot size for each residential dwelling unit is 40,000 square feet and the minimum lot size for any principal commercial structure is 60,000 square feet. [PL 1995, c. 171, §15 (NEW).]

H. Principal or accessory structures and expansions of existing structures that are permitted in the Resource Protection and Limited Residential Districts may not exceed 35 feet in height. This paragraph does not apply to structures such as transmission towers, windmills, antennas and similar structures having no floor area. [PL 1995, c. 171, §15 (NEW).]

1. Standards. In establishing additional performance standards under this section for any permitted use, the commission shall endeavor to develop standards which will assure that the uses under consideration will be located on suitable soils and will not result in unreasonable:

The commission may initiate, and any municipal agency, an organization qualified under section 966-A or any property owner or lessee may petition for a change in the boundary of any land use district or for amendments to any additional performance standard adopted pursuant to section 962-A. [PL 1979, c. 459, §1 (NEW).]

No change in a district boundary shall be approved unless substantial evidence shows that the area is better suited for uses other than those permitted in the district in which it is situated, or changes in conditions have made the present classification unreasonable. [PL 1979, c. 459, §1 (NEW).]

No amendment to performance standards shall be approved unless substantial evidence shows that: [PL 1979, c. 459, §1 (NEW).]

1. Conditions not in evidence. Conditions exist which were not evident when the performance standard was adopted;

[PL 1979, c. 459, §1 (NEW).]

2. Purpose not served. The performance standard does not serve the purpose of this chapter; or [PL 1979, c. 459, §1 (NEW).]

3. Amendment preferable. The amendment would better fulfill the purpose of this chapter.

[PL 1979, c. 459, §1 (NEW).]

§963. Variance from performance standards

1. Variance. A relaxation of the performance standards enacted by this chapter or adopted pursuant thereto may be granted by the commission, after notice and public hearing, upon a finding by the commission that the following provisions are met:

A. Application of the performance standard to the land or water area in question will result in undue hardship to the applicant, except that hardship may not be construed to include hardship:

(1) Attributable to any act, course of conduct or failure to act of the applicant or the applicant's predecessor in interest beginning with the owner of record on the effective date of this chapter or of a performance standard adopted pursuant to this chapter from which a variance is sought; or

(2) That is not unique to the petitioner's land; [PL 2023, c. 405, Pt. A, §140 (AMD).]

B. The variance, if granted, will not subvert the intent of this chapter as stated in section 951 or as manifested in the standards from which a variance is sought; and [PL 1979, c. 459, §1 (NEW).]

C. The proposed use, if a variance is granted, will not unreasonably interfere with the use and enjoyment of their lands by adjacent landowners, or result in any unreasonable:

- (1) Degradation of air and water quality;
- (2) Harmful alteration of wetlands;
- (3) Increase in erosion or sedimentation;
- (4) Danger of increased flood damage;
- (5) Obstruction of flood flow;
- (6) Damage to fish and wildlife habitat;
- (7) Despoliation of the scenic, rural and open space character of the corridor;
- (8) Overcrowding;
- (9) Excessive noise;
- (10) Obstructions to navigation; or
- (11) Interference with the educational, scenic, scientific, historic or archaeological values of those areas designated and approved for inclusion within the Resource Protection District. [PL 1979, c. 459, §1 (NEW).]

No variance shall be granted because of other nonconforming uses within a district or because of similar uses in an adjoining district. The burden of proof shall be on the applicant to show entitlement to a variance under this section. The owner of a building lot of record which is wholly within the corridor on March 19, 1974, shall be entitled to a variance for a single family residence which may be granted by the commission without public hearing. Any variance granted by the commission may be granted subject to such reasonable conditions concerning matters enumerated in section 959-B as the commission finds necessary to avoid the dangers enumerated in section 957-D. For the purposes of enforcement, variances granted hereunder and the conditions thereto shall be treated as orders of the commission.

§963-A. Special use variance

1. No variance where prohibited. No variance shall be granted in order to permit a use within a district in which such use is expressly prohibited, except in accordance with this section. A special use variance may be granted, after notice and public hearing, to permit a single family dwelling within the Resource Protection District upon a finding by the commission that the grant of such a special use variance is necessary to avoid undue hardship to the applicant, provided that hardship shall not be construed to include:

A. Any hardship attributable to any act, course of conduct or failure to act of the applicant or the applicant's predecessor in interest, beginning with the owner of record on March 19, 1974; or [RR 2021, c. 2, Pt. B, §260 (COR).]

B. Any hardship that is not unique to the petitioner's land. [PL 1979, c. 459, §1 (NEW).]

A special use variance under this section may be granted by the commission only in cases where such a variance is necessary to avoid a deprivation of property in violation of the Constitution of Maine, Article I, Section 6, a taking of private property without compensation in violation of the Constitution of Maine, Article I, Section 21, a violation of due process clause of the 14th Amendment of the Constitution of the United States, or a violation of other applicable state or federal constitutional provisions.

The owner of a building lot of record which is wholly within the corridor on March 19, 1974, shall be entitled to a variance for a single family residence which may be granted by the commission without public hearing. Any variance granted by the commission may be granted subject to such reasonable conditions concerning matters enumerated in section 959-B as the commission finds necessary to avoid the dangers enumerated in section 957-D. For purposes of enforcement, special use variances granted hereunder and the conditions thereto shall be treated as orders of the commission.

Except where otherwise specified by statute, any party or person aggrieved by any order or decision of the commission, in regard to any matter upon which there was a hearing before the commission and of which a record of said hearing is available, may, within 30 days after notice of the filing of such order or decision, appeal therefrom to the Superior Court by filing a notice of appeal stating the points of appeal. PL 1979, c. 459, §1 (NEW).

§969. Saco River Corridor Fund

1. Fund established. The Saco River Corridor Fund, referred to in this section as the "fund," is established as a nonlapsing dedicated, interest-bearing account. All charges collected pursuant to this section must be deposited into the fund. All interest earned by the account accrues to the fund. Any balance remaining in the fund at the end of the fiscal year does not lapse but is carried forward into subsequent fiscal years.

[PL 1997, c. 330, §1 (NEW).]

2. Fund purpose. The purpose of the fund is to preserve existing water quality and prevent the deterioration of water supplies in the Saco River, the Ossipee River and the Little Ossipee River within the Saco River Corridor, as created in section 953, by partially underwriting the administration and operation of the Saco River Corridor Commission, as established by Title 5, section 12004-G, subsection 13.

[PL 1997, c. 330, §1 (NEW).]

3. Assessment on the sale of water. For purposes of funding its activities, the commission shall impose a fee of 1% on the sale of water and fire protection services by a water utility that draws water either from the Saco River or from a groundwater source under the influence of the Saco River, as determined by the Department of Human Services, for sale and distribution to its customers. The fee must be levied on the rates of the water utility as authorized by the Public Utilities Commission to be charged for services provided by the utility. "Water utility" has the same meaning as the term is defined in Title 35-A, section 102, subsection 22.

The fee must be collected by the water utility and remitted quarterly to the commission. Notwithstanding any limitations set forth in Title 35-A regarding a water utility's right to increase its charges to its customers, a water utility with sales subject to this subsection is authorized to increase its overall charges for the purpose of collecting the fee set forth in this subsection.

Each water utility may retain a portion of the total fees collected equivalent to the utility's administrative costs incurred in the collection and remission of the fees, not to exceed 2% of the total fees collected. For purposes of the Public Utilities Commission's rate-making authority, costs actually incurred by the utility associated with the collection and remission of the fees for the fund are considered just and reasonable for rate-making purposes.

The commission shall adopt rules that are reasonably necessary to carry out the purposes of this section pursuant to section 954-C. Rules adopted pursuant to this subsection are routine technical rules as defined in Title 5, chapter 375, subchapter 2-A.

[RR 2019, c. 2, Pt. A, §41 (COR).]

4. Reporting requirements. The commission shall submit a report by February 1, 1998 and each subsequent year to the joint standing committees of the Legislature having jurisdiction over natural resources matters, energy and utilities matters and appropriations and financial affairs, identifying the amount collected and how the fund was disbursed by the commission.

[PL 2007, c. 651, §22 (AMD).]

5. Additional sources of revenue. The commission shall study usage within the Saco River Corridor for the purpose of identifying additional management needs and funding sources. The commission shall take all steps necessary to obtain revenue from these funding sources to ensure that assessments on the sale of water are not the sole source of revenue for the fund.
